Monitoring Requirements Not Met for Quincy Township Water System

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During December 5th -11th 2021 weekly distribution sample was not collected we failed to monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, the required sampling frequency, how many samples we took, when samples should have been taken, and the date on which corrective action samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
1013	Weekly	1	Dec 5 th -11 th , 2021	Weekly
VOC'S	ANNUAL		2021	By the end of calendar year

What happened? What was done? When will it be resolved?

System did not take a samples mentioned above, system is taking samples weekly on regular basis and will take VOC's for the Calendar year. Remember a Tier 3 Public Notification is Defined as "That cause no health effects" by the PA Department of Enviromental Protection more infor can be find at <https://www.dep.pa.gov/Citizens/My-Water/PublicDrinkingWater/pages/public-notification.aspx>.
